Protect the Places We Love – a letter to Graydon Smith, MPP, Earth Day 2023

Parry Sound-Muskoka greens

Dear Minister Smith,

We, your Parry Sound-Muskoka constituents, are alarmed by your government's failure to protect that which protects us -- our wetlands, shorelines, forests and farmlands. Our climate future depends on protecting these resources. The results we want to see are:

- ***protection for wetlands systems recently disqualified by Bill 23***
- ***reinstatement of municipal site plan approvals for developments under 10 units***
- ***an end to paving over Ontario's farmland***

For the good of the local economy and the well-being of future generations, will you commit to achieving these goals?
